

FLOW CYTOMETRY AND CELL SORTING SERVICE

<i>Code no.</i>	<i>Brief description of the services we offer</i>	<i>Price</i>
	Preliminary consultation on formulation of experimental design; during the consultation an estimate of the overall cost of the analyses can be provided. The Service offers consultations for specific projects, and estimates of the overall cost are provided free of charge according to the needs of the client. Please contact the representative for special requirements not shown in the price list, since the packages offered can be tailored to the customer's requirements. For routine analysis prices can be arranged (subscriptions may be possible).	No cost
CF-01	Immunophenotyping of 1 surface antigen. The procedure consist of antibody labelling, data acquisition and analysis.	€ 60/hour
CF-02	Immunophenotyping of 2-4 antigens through detection with specific fluorophore-conjugated antibodies. The procedure consist of compensation matrix, antibody labelling, data acquisition and analysis.	€ 70/hour
CF-03	Apoptosis quantification (monoparametric with PI). The procedure consist of staining, data acquisition and analysis.	€ 50/hour
CF-04	Apoptosis quantification (biparametric with AnnexinV/PI or 7-AAD). The procedure consist of antibody labelling and staining, data acquisition and analysis.	€ 70/hour
CF-05	Cell cycle analysis (monoparametric with PI). The procedure consist of staining, data acquisition and analysis.	€ 50/hour
CF-06	Cell cycle analysis (biparametric with BrdU-FITC/PI). The procedure consist of antibody labelling and staining, data acquisition and analysis.	€ 70/hour
CS-01	Immunophenotyping of 5 or more surface antigens. The procedure consist of antibody labelling, compensation matrix data acquisition and analysis.	€ 80/hour
CS-02	Monoparametric sorting (cells isolated according to the presence of GFP or of 1 surface antigen). The procedure consist of antibody labelling, set-up using AccuDrop test, data acquisition, sorting, check of the sorting purity.	€ 85/hour
CS-03	Multiparametric sorting (cells isolated according to the presence of 2 or more surface antigens). The procedure consist of antibody labelling, set-up using AccuDrop test, compensation matrix, data acquisition, sorting, check of the sorting purity.	€ 110/hour
CFCS-01	Multiparametric analysis of the expression of cytokines, transcription factors and phospho-proteins using specific kits, also in combination with surface immunophenotyping.	

CFCS-02	Expansion of cell lines and possible treatment with exogenous substances aimed at supply specific Cytometry and Cell Sorting services.	To agree with the customer
CFCS-03	Consultancy/ technical-practical courses/ other services	To define depending of the customer's requirements

Some of the services/products offered may be provided in collaboration/integration with other services of the LTTA Laboratory. Each service includes the supply of images and/or files for scientific publication.

Prices are shown without VAT and are subjected to change according to the cost of consumables (every 12 months).
